

# Global Macular Degeneration Treatment Market Size And Market Growth Opportunities

*The Business Research Company covers the macular degeneration treatment market drivers and restraints, market size and the impact of COVID-19 on the market.*

LONDON, GREATER LONDON, UK, May 11, 2022 /EINPresswire.com/ -- According to 'Macular Degeneration Treatment Global Market Report 2022 – Market Size, Trends, And Global

Forecast 2022-2026' published by The Business Research Company, the macular degeneration treatment market size is expected to grow from \$7.55 billion in 2021 to \$8.08 billion in 2022 at a compound annual growth rate (CAGR) of 7.04%. The growth in the market is mainly due to the companies' resuming their operations and adapting to the new normal while recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The global macular degeneration treatment size is expected to reach \$10.65 billion in 2026 at a CAGR of 7.15%. The increasing burden of retinal disorders is expected to propel the macular degeneration treatment market industry growth.

The macular degeneration treatment global market consists of sales of macular degeneration treatment by entities (organizations, sole traders, and partnerships) that are used to treat macular degeneration eye disease. Macula refers to the central portion of the retina, a light-sensitive layer of tissue at the backside of the eye. The macula is responsible for central vision. Degeneration of the macula, which affects the central part of the retina (the macula) and results in distortion or loss of central vision, occurs most commonly after the age of 60 and is referred to as age-related macular generation (AMD). Macular degeneration treatment helps to slow the disease and prevent severe loss of vision.
