

# Dream Changer Device Can Help Children Control Nightmares

*Confirmed effective by preliminary research, placebo remote control is now available on Indiegogo and can be donated to Ukrainian children.*

BOSTON, MASSACHUSETTS, UNITED STATES, May 11, 2022

/EINPresswire.com/ -- Dream Changer™, a device that helps children control nightmares, has launched on [Indiegogo](https://www.indiegogo.com/). Dream Changer™ was shown to be effective at reducing childhood nightmares in a randomized controlled trial published by Oxford University Press. Project backers can now buy a Dream Changer™ for themselves or donate one to a Ukrainian child sheltering in Poland.

Dream Changer™ changes the channel on bad dreams.

Configured like a TV remote, a child presses a button on the device to “change the channel” on a bad dream. When the button is pushed, a blue edge light turns on and nothing more. The device offers a sense of control and reinforces positive visualization.

“

Dream Changer™ empowers a child and can have a long term impact on their life.”

*Mike Marks*

Many studies have found a strong correlation between sleep and mental health. Recent reports on Ukrainian refugees have pointed to lost sleep as a serious mental

health issue for Ukrainian children who have fled from the current war.

“Dream Changer™ empowers a child and can have a long term impact on their life.”
