Dr. John Pardini

Exeter Orthodontics has been able to keep prices low by specializing only in braces and [Invisalign](#). By limiting their service offerings, the team has enhanced efficiency and kept overhead costs low. All cost savings are passed directly to the patients.

Traditional braces are the most popular service available. Because they are attached to the teeth, braces are often more compliant than other removable options. However, Invisalign is quickly becoming a comfortable and convenient alternative. The transparent, removable aligners gradually straighten teeth over time.

During a free consultation, Dr. Pardini and his team will help patients decide whether traditional braces or Invisalign aligners are more appropriate for their needs.
