

Digitalization Transforms The Facade System Market Outlook—Learn More In The Business Research Company's Market Analysis

The Business Research Company's Facade System Global Market Report 2022 – Market Size, Trends, And Global Forecast 2022-2026

LONDON, GREATER LONDON, UK, May 13, 2022 /EINPresswire.com/ -- The advent of media/digital facades is a key trend gaining popularity in the façade systems market. Media or digital facades are defined as groups of digitally controlled LED nodes that are individually controllable. Digital

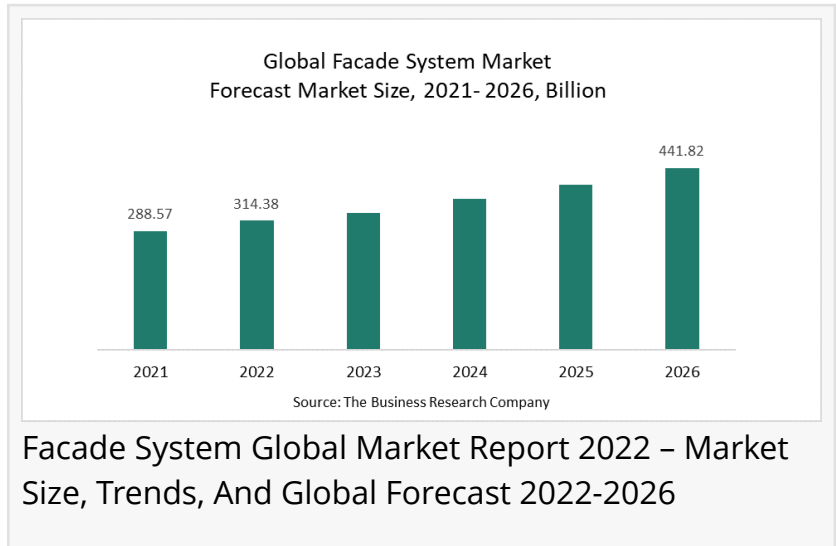

facades are usually mounted at the exterior part of the building to form an integral architectural vision. Media/Digital facades are used to transform the external architecture of building into video displays along with digital LED nodes. For instance, In November 2020, GLAAM Media Glass, Information and communications technology light emitting diode (ICT LED) glass building material provider partnered with ANC to offer integrated and controllable solutions to clients specifically in the U.S. who are looking for expert media façade technology. Digital billboards and outdoor commercial displays are some of the popular application areas of media/digital façade technology. According to the facade system market research, the increasing demand for the digital façade is driving the demand for its implementation across the façade system market.
