Market Dynamics:

The manufacturing and construction industry is booming right now attributable to factors such as rapid urbanization and industrialization worldwide, increasing construction activities, availability of high-quality raw materials at affordable prices, and rapid advancements in the manufacturing processes. Other factors such as increasing demand for smart buildings and smart homes, increasing disposable income, improving standard of living especially in the developing countries, and integration of advanced technologies such as IoT, machine learning, and automation to improve operational efficiency are expected to boost market revenue growth over the forecast period. In addition, favorable government policies, high preference for eco-friendly and sustainable construction activities, and increasing renovation activities are expected to further boost global market growth between 2021 and 2028.
