The decorative concrete market consists of sales of decorative concrete by entities (organizations, sole traders, and partnerships) that are used to provide attractive structure and good looks to the building surfaces. Decorative concrete is a form of concrete that is treated in various ways to enhance its aesthetic appeal. Decorative concrete involves the treatment of concrete in various ways such as embossing, polishing, molding, texturing, etching, coloring, embedding items, applying cementitious toppings, or a combination of these.

The 3D concrete printing technology is shaping the decorative concrete market. The 3D concrete printing technology also known as additive manufacturing technology, includes the creation of three-dimensional shapes through computer-controlled sequential layering. It is primarily used for prototyping and manufacturing geometrically complex components. The use of 3D concrete printing technology is growing in the construction industry, as it reduces errors, increases design flexibility, reduces environmental impact, and requires fewer materials compared to traditional building techniques.
