Which one should be recommended? We will tell the difference from the main specifications and some special points of them.

Dangbei alunching Mars Pro 4k Projector

Resolution&Brightness

Anker Nebula Cosmos 4K laser projector and [Dangbei](#) Mars Pro both adopt ALPD laser source and feature 4K resolution, promising the stunning detailed imagery. As for the brightness, Anker Nebula Cosmos 4K gets 2,400 lumens(equals to 3,000ANSI lumens) while Dangbei Mars Pro achieves 3,200 ANSI lumens. Dangbei Mars Pro is a little brighter than Anker Nebula Cosmos 4K. To the naked eye, there is not much difference in brightness between the two. Both of them have almost reached the best line of brightness and resolution within the projector industry.

Smart functions

As smart projectors, Anker Nebula Cosmos 4K laser projector and Dangbei Mars Pro have been studied in depth in terms of automatic adjustment and ease of use of the projector. They both support a couple of auto adjustments. Anker Nebula Cosmos 4K laser projector supports auto

keystone correction, auto screen fit, seamless autofocus. Dangbei Mars Pro supports auto keystone correction, auto screen alignment, real-time autofocus, auto obstacle avoidance, auto screen-off.

About Projection Image

Except for stunning 4K resolution, Anker Nebula Cosmos 4K laser projector adopts HDR10 and Dangbei Mars Pro gets HDR10+ to enhance the image quality. Also, both support 3D effect, allowing you to enjoy the immersive viewing at your private space. There is also a difference about the projection size. The Anker Nebula Cosmos 4K laser projector can project a screen up to 150", while the Dangbei Mars Pro can reach a maximum of 300".

BUILT-IN System

In terms of Built-in System, Anker Nebula Cosmos 4K laser projector wins. It adopts Android TV 10.0, containing 400,000+ movies and episodes on 7,000+ apps, including the most popular streaming platforms. The powerful Android TV 10.0 undoubtedly offers a big convenience for users. Dangbei Mars Pro is powered by its own-developed system---emotn system. You need to download the store and these video apps.

Memory&Ports

Anker Nebula Cosmos 4K laser projector is equipped with 2GB(RAM)+16GB(ROM), while Dangbei Mars Pro is loaded with 4GB(RAM)+128GB(ROM). Dangbei Mars Pro wins a lot in memory. Does the memory count? Definitely yes! A large memory guarantees the smooth operation of the projector and offers you a chance to download many wonderful videos so that you can watch it from anytime to anywhere.

Eye guard

Both Anker Nebula Cosmos 4K and Dangbei Mars Pro adopts auto screen-off function. Any time you
