The report also includes competitor and regional analysis, and contemporary advancements in the market. The market is currently witnessing strong growth. The United States Frozen Pizza market to exhibit moderate growth during the next five years.

United States Frozen Pizza Market

Frozen pizzas have gained popularity in the United States as they can be consumed any time after reheating. They are half-baked and stored at low temperatures to preserve their nutritional content and flavor. As they offer convenience and have a longer shelf life as compared to freshly made pizzas, they are extensively used in cafes, hotels, and quick-service restaurants (QSRs).

As the novel coronavirus (COVID-19) crisis takes over the world, we are continuously tracking the changes in the markets, as well as the purchase behaviours of the consumers globally and our estimates about the latest market trends and forecasts are being done after considering the impact of this pandemic.

Market Trends:

There is a considerable rise in the demand for frozen pizzas across the United States on account of hectic schedules and high disposable incomes. This can also be attributed to the burgeoning food and beverage (F&B) industry and the escalating consumption of convenience and ready to eat (RTE) food products. Apart from this, the leading manufacturers are focusing on expanding their existing consumer base. As a result, they are introducing innovative product variants made using whole wheat, multigrain, and fat- and artificial preservatives-free ingredients. Furthermore, these manufacturers are coming-up with dairy-free frozen pizza to suit the dietary needs of the lactose-intolerant population.
