The chlor-alkali market consists of sales of chlor-alkali products by entities (organizations, sole traders, and partnerships) that refer to the method used to manufacture chlorine and sodium hydroxide (caustic soda), both of which are basic chemicals required by industry. Chlor-alkali is a group of chemicals such as chlorine, hydrogen, and sodium hydroxide that is produced by the electrolysis of saltwater. Chlorine is abundantly produced through this process and is an essential component in bleaching agents, solvents, construction materials, and insecticides.

## [Global Chlor-Alkali Market Trends](#)

Strategic partnerships and collaborations have emerged as a key trend shaping the chlor alkali market outlook. Global chlor alkali market analysis shows that this is owing to the presence of a large number of chlor-alkali firms operating in the industry and their desire to expand their market leadership. For instance, in June 2021, Abu Dhabi National Oil Company (ADNOC), a UAE-based oil company, and Reliance Industries Limited, an India-based integrated company across materials, entertainment, energy, retail, and digital services formed a strategic partnership to join a new world-scale, ethylene dichloride, Chlor-alkali, and polyvinyl chloride production facility in Abu Dhabi. This partnership aims to leverage the strengths of both companies as global industrial leaders. Also, in October 2020, Grasim Industries Limited, an India-based

manufacturing company, and Lubrizol, a US-based chemicals company formed a partnership to manufacture chlorinated polyvinyl chloride (CPVC) resins in India. CPVC resin will be manufactured in chlor-alkali unit of Grasim. This partnership aims to bring world-class technologies to complement Lubrizol's growth strategy in chlor-alkali platform in India.
