Pilates focuses on core strength, breath awareness, and spine alignment, whereas yoga is a collection of movements that stimulate and rejuvenate the entire body.

Increasing prevalence of obesity, owing to unhealthy food habits and lifestyles, is considered the

main reason behind chronic health issues, such as diabetes, thyroid disease, and others. People are, therefore, becoming more health conscious, which is expected to drive the global Pilates and yoga studios market revenue growth. Furthermore, growth of Pilates and yoga studios is also being driven by increase in Pilates and yoga memberships, as well as supportive government initiatives to promote healthy lifestyles.

Promotions and marketing activities have always been an effective approach for Pilates and yoga businesses to expand their market reach. However, presence of other alternatives, such as multi-specialty gyms, fitness centers, and therapeutic programs, is restricting Pilates and yoga studios market revenue growth.
