The ethylene-vinyl acetate market consists of sales of ethylene-vinyl acetate products by entities (organizations, sole traders, and partnerships) that is an elastomeric copolymers of ethylene and vinyl acetate used to produce rubber-like materials. Ethylene Vinyl Acetate (EVA) is an elastomeric polymer that provides durability, crack resistance, and flexibility to certain materials. It is an ethylene-vinyl acetate copolymer with a vinyl acetate concentration ranging from 10% - to 40%. EVA has improved stress crack resistance and can maintain flexibility without the use of plasticizers throughout a wide temperature range of 60°C to 150°C.
