GoodFirms Research

GoodFirms recently carried out a detailed analysis and ranking of the global blockchain technology agencies through its Leaders Matrix program. The analysis included a thorough inspection of the blockchain technology companies' service landscape, verified client reviews, experience in the domain, market, and competitive positioning. Such an analysis brings out the strategic information about the vendor capabilities, competitive differentiation, and market position.

A massive surge for blockchain integration to enhance decentralized operations has created a demand for blockchain technology companies in recent years. Interestingly, several startup blockchain companies are taking advantage of the increasing requisites of blockchain solutions to mark their presence and create an impact.

The GoodFirms research team assessed the companies to find the top leaders in blockchain technology companies based on Core Competencies and a 360-Performance view. Each component integrates several factors that are considered to evaluate the legitimacy of competencies.

Further, based on the above-mentioned assessment process, each company is grouped into one of four different quadrants: Industry Contenders, Industry Leaders, Upcoming Achievers, and Market Influencers, where the service providers are mapped based on their areas of focus and their proven ability to deliver.
