If your company needs to improve overall security and/or has special physical security needs, don't miss this special podcast episode with physical security expert Chris Ciabarra."

John Verry, CISO & Managing Partner - Pivot Point Security

mitigation drivers are bringing cybersecurity together with physical security, similar to what has been happening with privacy. With physical security, the drive to merge with cyber is growing as IoT devices—and associated vulnerabilities—proliferate in the physical security realm.

To share how the physical/cybersecurity convergence can look and overview his company's leading "hybrid" metal detection technology and techniques, the latest episode of The Virtual CISO Podcast features Chris Ciabarra, Co-Founder and CTO of Athena Security.

Topics discussed include:

- Why the lines between cybersecurity and physical security are increasingly blurred
- Why a unified view of physical and cybersecurity has become so critical to the overall security
- The multiple business benefits of converging physical security and cybersecurity
- Physical security technology that Athena Security is advancing and what industries are embracing it fastest
- How Athena "accidentally" came up with a COVID-19 detector

If your company needs to improve overall security and/or has special physical security needs, don't miss this special podcast episode with physical security expert Chris Ciabarra.
