## **About Parking Concepts:**

PCI was founded in 1974 by Gill Barnett. His "concept" was to specialize and focus on the California market and to provide exemplary service, for both our patrons and clients, which was previously unheard of in the parking industry. Prior to that time, few parking companies cared much about "the customer" or what corporate image was being presented. For most operators, all that mattered was the "bottom line" and the number of locations that could be secured. Gill intended to accomplish his goals and objectives through dedication, hard work, and by hiring the best parking professionals in the industry. His formula has proven to be a highly successful one. PCI has grown into a national provider of Parking and Transportation services, expanding throughout North America, while maintaining the same business model focus on its core beliefs and goals everywhere it operates. PCI provides parking in many cities and states, including but not limited to Los Angeles, CA, San Francisco, CA, and Dallas, TX.
