The coating additives market consists of the sale of coating additives by an entity (organizations, sole traders, partnerships) that refers to a specialized group of chemically engineered materials designed to enhance performance by modifying the rheology, and coating formulations anti-foaming properties, wetting and dispersing properties. Coating additives are used to remove defects in the coating such as foam bubbles, poor levelling, and flocculation. They are also used to impart specific properties to the formulations such as better slip, flame retardance, UV stability, chemical resistance and other properties.

Global Coating Additives Market Trends

The investment of companies in R&D is one of the key coating additives market trends gaining popularity. Companies operating in coating additives market are increasing investments in R&D sectors and initiatives to develop technologically advanced products to meet demand from various end user industries across the globe. For example, in June 2021 BASF a multinational chemical company invests in a new R&D centre in Japan for development and production of new products. This R&D centre is established to get global R&D expertise and local R&D flexibility to provide the best solutions.

Global Coating Additives Market Segments

The global coating additives market is segmented:

By Type: Acrylics, Fluoropolymers, Urethanes, Metallic Additive, Other Types

By Function: Anti-foaming, Wetting & Dispersion, Rheology modification, Biocides, Impact Modification, Other Functions

By Application: Architectural Application, Automotive, Industrial Application, Wood & Furniture, Other Applications

By Geography: The global coating additives market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa. Among these regions, Asia Pacific accounts for the largest share.
