The express delivery market consists of sales of express delivery services by entities (organizations, sole traders, and partnerships) that provide the fastest form of shipping. Express delivery services assemble, transport, and distribute products in a timely manner while tracking and maintaining control of the goods along the service's supply chain. The consumer must pay a higher fee for fast delivery, and the product is delivered to the customer within 24 to 72 hours.

Global Express Delivery Market Trends

Technological advancements have emerged as a key trend gaining popularity in the express delivery market. According to TBRC's express delivery market overview, major companies are focused on adopting advanced technologies to strengthen their position in the market. For instance, in May 2019, DHL Express, a Germany-based logistics company launched a fully automated and smart drone delivery service to tackle the express delivery challenges in urban areas of China. This is designed with smart and secure flight control modules that will help in vertical take-off and landing, visual identification, high-accuracy GPS, fully automated flight, smart flight path planning, and real-time scheduling.
