The pulmonary arterial hypertension market consists of sales of drugs by entities (organizations, sole proprietors, partnerships) that are used in the treatment of pulmonary arterial hypertension disease, which is a rare progressive disorder characterized by high blood pressure in the arteries of lungs. During this medical condition walls of the pulmonary arteries thicken and stiffen, making it difficult for the blood to flow through the lungs. The pulmonary arterial hypertension drugs relax the muscles in the wall of the blood vessels or increase the blood flow through the lungs or reverse the effect of the substance in the walls of blood vessels, which caused them to narrow.

## Global [Pulmonary Arterial Hypertension Market Trends](#)

Technological advancements are key trends gaining popularity in the pulmonary arterial hypertension market. The companies operating in the pulmonary arterial hypertension drugs sector are focusing on developing new medicines to improvise and cure the diseases. In March 2019, Sandoz, a Switzerland-based company specializing in high-quality affordable medications
