The commercial seeds market consists of sales of commercial seeds by entities (organizations, sole traders, and partnerships) that are the seeds sown for production of an intended crop or used as animal feed. Commercial seeds are hybrid seeds sold for the purposes other than for production of propagating material. These commercial seeds are divided into two types, conventional seeds and genetically modified seeds. Corn, soybean, vegetable, grains, cotton, rice, and canola are among the conventional seeds. Soybean, corn, cotton, and canola are the most common genetically modified seeds.
