The network automation global market consists of sales of the network automation by entities (organizations, sole traders, partnerships) that refers to software, which automates the network and security provisioning and management, to maximise the network efficiency and functionality. Network automation software predicts the efficient way to map, configure, provision and manage network and increases the speed of application development by automating network and security provisioning management.

Global [Network Automation Market Trends](#)

Network Automation-as-a-Service (NaaS) With Cloud Vision or Software-as-a-Service (SaaS) is the key trend gaining popularity in the network automation market. NaaS is a cloud model which enables users to operate and maintain the network without owning a network operating infrastructure. Cloud Vision or Software-as-a-Service (SaaS) is an application used to deliver the service over internet access. The companies operating in network automation market are focusing on offering products through new business models to increase customer reach and business presence.
