The green global cement market consists of sales of the green cement by entities (organizations, sole traders, and partnerships), which refers to a form of cement produced with the help of a carbon-negative manufacturing process. Green cement is an environmentally friendly product that reduces the carbon footprint of cement production. Green cement production reduces cement intakes, and the raw materials used in it discarded industrial wastes such as blast furnace slag, fly ash, and others.

Global Green Cement Market Trends

Technological innovations in green cement are a key trend gaining popularity in the green cement market. Major companies operating in the green cement sector are focused on developing new technological solutions to expand their existing product portfolio and strengthen their position in green cement or eco-friendly cement.
