The underfloor heating market consists of sales of underfloor heating systems by entities (organizations, sole traders, and partnerships) that refer to systems that warm the floor or act as a primary heat source. The different types of underfloor heating systems include hydronic underfloor heating, electric underfloor heating, heating cables, heating mats, and others. Underfloor heating works by distributing a lower temperature of warm water through a circuit of pipes under the finished floor. Heat is then monitored and controlled by intelligent thermostats to maintain a consistent temperature throughout the property or individual zones. The underfloor heating systems are used by the industries, residential, commercials, and other entities.

[Global Underfloor Heating Market Trends](#)

Strategic partnerships between companies are a recent trend that is gaining popularity in the underfloor heating market. Companies in the underfloor heating market are entering into a

strategic collaboration with technology players for the development of technologically advanced underfloor heating products with innovative features.
