The advancement in the field of medical science has introduced life-changing medicine to treat incurable diseases, and the awareness regarding multiple sclerosis drugs is the main driving force to this market. Approximately 1 Million U.S. citizens are affected by this disease, and 2.3 million people live with it worldwide. This common prevalence boosts the need for effective multiple sclerosis treatment pushing the biopharmaceutical industry to produce more drugs annually. The aggravating government initiatives to increase awareness about the auto-immune condition and provision of low-interest loans act as a significant factor towards revenue growth. Available in the form of oral pills and injections, multiple sclerosis drugs have a broad spectrum of FDA approved medications available at a medical representative's prescription.
