

Piktochart Launches 200+ New Visual Assets

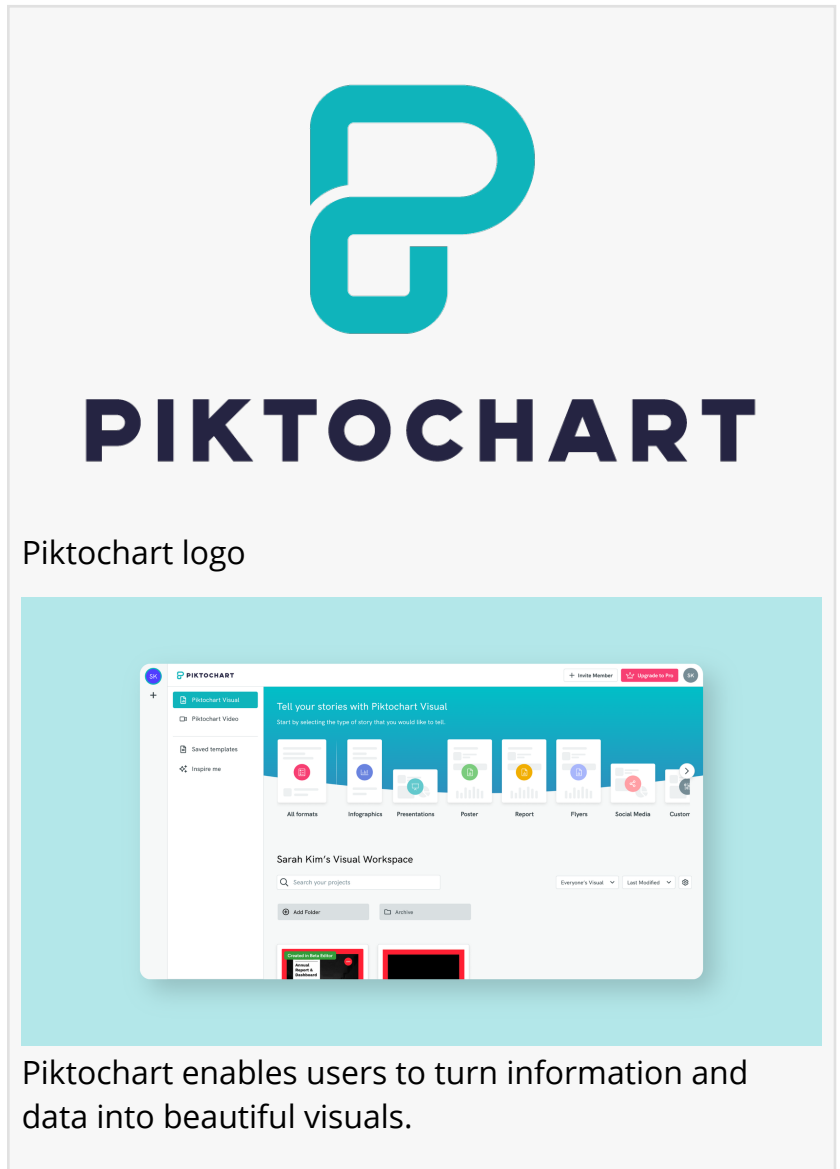

The all-in-one communication platform Piktochart released over 200 new editable graphics to support users in visualizing data.

PENANG, MALAYSIA, May 19, 2022 /EINPresswire.com/ -- Piktochart continues its series of releases with new editable templates and text frames, on a mission to make informational design available to everyone. The 185 new text frames include process and flow charts, quadrant and Venn diagrams, and mind maps, while 45 new [design templates](#) focus on business, human resources, and events.

The release comes one month after integrating its [video editor](#) into the core platform, which influenced the rebranding of the tools into [Piktochart Visual](#) and Piktochart Video.

The company releases new templates, icons, and graphic elements every month with the goal of offering users high flexibility in creating visuals. When customizing a template, the font, color, text, and sections can be changed or removed, while the other elements are part of a free gallery in the editor and can be used with drag-and-drop.

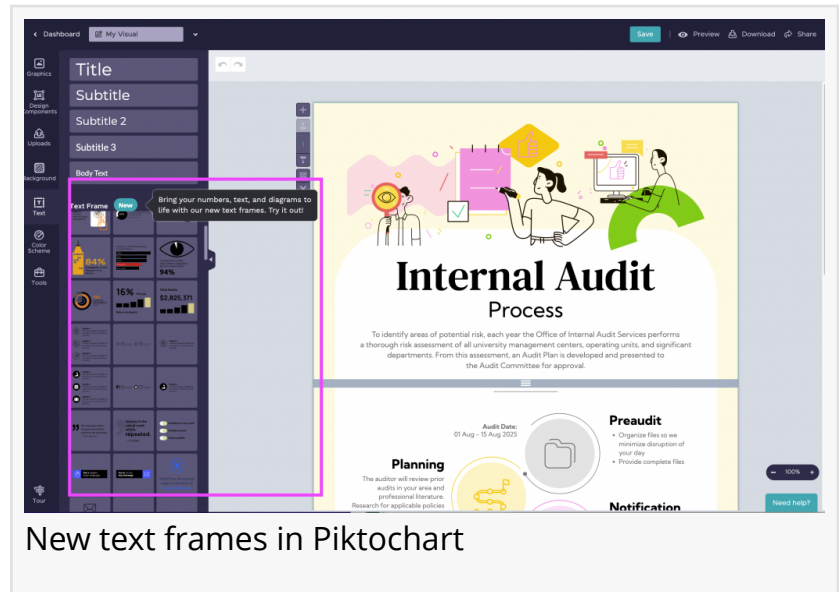

Piktochart Visual focuses on making it easy for non-designers—business, education, HR, marketing, and sales professionals—to turn information and data into beautiful visuals. The platform can be tried for free by signing up on the Piktochart website.
