The global real estate software market consists of sales of real estate software by entities (organizations, sole traders, and partnerships) that are used for automating administrative, marketing, and other business tasks in real estate companies. Real estate software helps companies manage various functions such as operations, planning, stakeholder management, financing, marketing, and many others.

Global Real Estate Software Market Trends
The adoption of artificial intelligence and machine learning is a rising trend shaping the real estate software market outlook. Artificial intelligence (AI) enabled applications to help real estate companies in marketing campaigns, managing property portfolios, leasing, accounting, operations, and many other functions. One of the recent developments of AI in the real estate market is virtual tours. Virtual tours are provided for properties that are still under construction, or for customers abroad, where the customer can see the 3D view of the property. For instance, in February 2021, Zillow Group, an online real-estate marketplace company, launched a virtual tour experience that uses machine learning using various media content to create an interactive floor plan, which makes it easy for buyers to feel the property without visiting in person.

Global Real Estate Software Market Segments
The global real estate software market is segmented:
By Product: Enterprise Resource Planning (ERP), Property Management System (PMS), Customer Relationship Management (CRM)
By Deployment Type: Cloud, On-Premise
By Application: Commercial, Residential
By Geography: The global real estate software market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa. Among these regions, North America accounts for the largest share.
