> *GoodFirms Research*

GoodFirms recently carried out a detailed analysis and ranking of the global software testing agencies through its Leaders Matrix program. The assessment included an in-depth inspection of the software testing companies' service landscape, verified client reviews, experience in the domain, market, and competitive positioning. Such an analysis brings out the strategic information about the vendor capabilities, competitive differentiation, and market position.

With the massive surge for high-quality and better-performing products, software testing is turning out to be critical. It has created an enormous demand for software testing companies. Interestingly, several startup software testing companies are taking advantage of the increasing requisites of software testing solutions to mark their presence and create an impact.

The GoodFirms research team assessed the companies to find the top leaders in software testing companies based on their core competencies and a 360-Performance view. Each component integrates several factors that are considered to evaluate the legitimacy of competencies.

Further, based on the above-mentioned assessment process, each company is grouped into one of four different quadrants: Industry Contenders, Industry Leaders, Upcoming Achievers, and Market Influencers, where the service providers are mapped based on their areas of focus and their proven ability to deliver.
