The general minerals market consists of sales of general minerals by entities (organizations, sole traders and partnerships) that mine construction sand and gravel, industrial sand, kaolin and ball clay, clay and ceramic and refractory minerals, potash, soda and borate mineral, phosphate rock, or other chemical and fertilizer minerals mining.

Global [General Minerals Market Trends](#)

Mining companies are using advanced geosynthetic clay liners to prevent leakage and corrosion in mining operations. GCLs are geotextile and bentonite composites used in environmental containment applications. Advanced GCLs have higher chemical compatibility, slope stability, composite construction, swelling capacity and lower permeability than conventional clay liners. Other benefits of GCL include easy installation, better hydraulic performance, and resistance to varying weather conditions.

Global General Minerals Market Segments

The global general minerals market is segmented:

By Type: Potash, Salt, Magnesite, Sulfur, Kaolin, Asbestos, Feldspar, Boron, Gypsum, Talc,

Graphite, Baryte, Bentonite, Diatomite, Lithium, Selenium, Perlite, Vermiculite, Arsenic, Others
By Organisation Size: Large Enterprises, Small and Medium Enterprises
By Service Provider Type: Independent Contractors, Companies
Subsegments Covered: Flake Graphite, Non-Flake Graphite Large Grade Vermiculite, Fine and Finer Grade Vermiculite, Medium Grade Vermiculite
By Geography: The global general minerals market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa. Among these regions, Asia-Pacific accounts for the largest share.
