The stones market consists of sales of stone by entities (organizations, sole traders and partnerships) that mine and quarry dimension stone such as rough blocks or slabs of stone and crushed and broken stone. It also comprises stone beneficiating activities such as crushing, grinding, washing, screening, pulverizing, and sizing. The stones market is segmented into dimension stones and crushed stones.

[Global Stones Market Trends](#)

Precision Surface Excavation Machines are becoming more popular because they help to reduce noise and pollution in sensitive areas. Precision surface excavation machines are versatile units that utilize a slicing drum to mechanically unearth materials and have advantages over the customary drilling and blasting strategies. Surface excavation machines are low in noise, dust and vibration and can cut more precisely and produce a smaller, more consistent particle size thus eliminating the need of a primary crusher. This is particularly important in mines in environmentally sensitive areas where noise and dirt pollution need to be minimized due to environmental regulation and pressure.

[Global Stones Market Segments](#)

The global stones market is segmented:

By Type: Dimension Stones, Crushed Stones

By Organization Size: Large Enterprises, Small and Medium Enterprises

By Service Provider Type: Independent Contractors, Companies

By Geography: The global stones market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa. Among these regions, Asia-Pacific accounts for the largest share.
