The vegan market consists of the sale of vegan products and related services for consumption purposes. Vegan products include food and beverages produced without the use of animal ingredients or animal-derived ingredients. Vegan food products include fruits and vegetables, legumes such as peas, beans, plant protein-based tofu and plant protein-based meat.

## Global [Vegan Food Market Trends](#)

One of the trends in the vegan market is the production of meat through cell-based technology. The cell-by-cell identical meat is produced in factories without involving the killing of animals. Production of cell-based meat involves feeding the animal cells with nutrients and proteins thus, eliminating the need for dependence on animals for meat.

## Global Vegan Food Market Segments

The global vegan food market is segmented:

By Product Substitute: Dairy Alternative, Meat Substitute, Others

By Distribution Channel: Online, Offline

By Source: Wheat, Soy, Oats, Almond, Others
