In terms of revenue, the global GHS labels market is estimated to grow by 1.6x during the forecast period, owing to numerous factors such as increasing demand from chemicals and other industries

GHS stands for globally harmonized system of categorizing and labelling chemicals. Stringent regulations are implemented around the world, compelling the classification of hazardous chemicals on labels. With focus on safer packaging rising, the GHS label market will significantly expand in the coming years.

Among end users, manufacturers are expected to account for a higher share in the demand for GHS labels. According to the report, manufacturers are expected to account for over half of demand exhibited in the market.

How will Demand for Chemical Industries Affect Sales of GHS Labels?

“Chemical Industries to catalyze the Growth”

Among various industries exhibiting the demand for GHS labels, the chemical industry has emerged as a leading end user. With expansion of chemical industry, the demand for GHS labels is rising around the world. The global production of chemicals grew by 1.17% in 2020, much slower than in 2019. However, the situation has improved in the post-Covid era.

Key Takeaways of GHS Labels Market Study

After a period of negative growth, GHS labels sales will improve marginally, registering a 0.2% y-o-y growth in terms of value in 2022

Expansion of chemicals sector will boost growth in the U.S., enabling it to hold 87% share in the North America market in 2022

The U.K. will register negative y-o-y growth in 2021, however, sales are poised to improve 2022 onwards

Germany will record positive growth in sales in 2021, however, sales in France will recover 2022

onwards

Increasing production and export of chemicals has placed China as the dominant market in East Asia, followed by Japan and South Korea

"Besides implementation of stringent regulations, requiring the chemical sector to clearly state potential hazards, focus on preventing counterfeiting of products will give tailwinds to growth registered by the market," said a lead analyst at FMI.

The risk of loss of commodity due to mishandling the hazardous chemicals while transit is always there by all modes of transit, such as rail, road, and sea. But the usage of globally harmonized system labels can help shippers as well as the buyers and sellers of hazardous chemicals to ensure safe and easy handling of harmful chemicals.

Expansion of the chemicals industry has stimulated growth in various several markets, including that for GHS labelling. With increasing demand for labelling, manufacturers are also offering advanced labelling solutions to brand owners which provide tracking, and tracing of chemical products. However, major challenge faced by logistics companies is the counterfeit of chemicals which can be reduced by usage of GHS labels.

Growing of the chemical sector, particularly in global markets, has led to emergence of modern facilities that sell wide variety of product categories in bulk quantities. GHS labels reduce chances of package tampering, which ensures right delivery of products to consumers. Various GHS label manufacturers offer labels that can be applied on variety of substrates such as glass, paper, plastics, etc. with the latest technology such as RFID, which are used as unified classification for packaging in the chemical sector.

About Us

Future Market Insights (ESOMAR certified market research organization and a member of Greater New York Chamber of Commerce) provides in-depth insights into governing factors elevating the demand in the market. It discloses opportunities that will favor the market growth in various segments on the basis of Source, Application, Sales Channel and End Use over the next 10-years.
