

Soil Testing Equipment Market Business Scenario, Size, Share, Growth, Trends and Forecasts Report 2028

Increasing adoption of soil testing equipment in construction sector is a key factor supporting global soil testing equipment market growth

VANCOUVER, BC, CANADA, May 19, 2022 /EINPresswire.com/ -- The global [soil testing equipment market](#) size is expected to reach USD 8.36 Billion in 2028 and register a steady CAGR over the forecast period, according to latest analysis by Emergen Research. Steady market revenue growth can be attributed to growing utilization of soil

testing equipment in the construction sector. Increasing construction activities in developing countries and responsibility to ensure safe construction and need for reliable geotechnical soil investigation are contributing to increasing demand for and use of soil testing equipment in the construction sector globally. Structural engineers opt for mandatory soil testing to determine weight bearing capacity and structure stabilization on soil.

Soil Testing Equipment Market Size – USD 3.82 Billion in 2020, Market Growth – at a CAGR of 10.4%, Market Trends – Technological advancements in soil testing equipment”

Assessment of behavior of soils under varying conditions of loading, moisture, temperature, and stress requires usage of soil testing accessories and equipment. Geotechnical investigation of soil helps structural engineers in making better decisions, thus leading to the success of the construction project. Increasing investment

of by major players for launch of technologically more advanced soil testing equipment is projected to drive growth of the soil testing equipment market.

The key companies studied in the report are:

Agilent Technologies

Thermo Fisher Scientific

Merck Group

PerkinElmer

Controls S.p.A.

LaMotte Company, Inc.

Geotechnical Testing Equipment UK Ltd.

Sun Labtek Equipment (I) Pvt. Ltd

Martin Lishman Ltd.

S.W. Cole.

Others

Some Key Highlights from the Report

In June 2020, Agilent Technologies announced the launch of two new mass spectrometry (MS) products namely the Agilent 6470B Triple Quadrupole LC/MC (6470 LC/TQ) system and the Agilent Rapid Fire 400 system. Both the systems deliver faster detection of target compounds providing customers increased sample throughput and reduced time to generate results.

Residual segment accounted for largest revenue share in 2020. Growing awareness among consumers regarding negative effects of chemical residues such as fertilizers and pesticides in fruits and vegetables is driving need for soil testing.

Laboratory segment revenue is expected to expand at a rapid CAGR during the forecast period. Geotechnical laboratories for research and development are increasingly utilizing more advanced equipment to improve soil testing accuracy.

Construction segment accounted for a significantly large revenue share in the soil testing

equipment market in 2020. Rising need to prevent building collapse caused due to lack of geotechnical soil investigation is expected to increase demand for soil testing equipment in the construction sector.

North America accounted for largest revenue share contribution to the global soil testing equipment market in 2020. Increasing investment by major players in the region for launch of more technologically advanced soil testing equipment is projected to drive market growth.

Emergen Research has segmented the global soil testing equipment market on the basis of type, site, end-use, and region:

Type Outlook (Revenue, USD Billion; 2018–2028)

Chemical

Physical

Residual

Site Outlook (Revenue, USD Billion; 2018–2028)

On-site

Laboratory

End-use Outlook (Revenue, USD Billion; 2018–2028)

Construction

Agriculture

Others

Regional Outlook (Revenue, USD Billion; 2018–2028)

North America

U.S.

Canada

Mexico

Europe

Germany

France

U.K.

BENELUX

Italy

Spain

Rest of Europe

Asia Pacific

China

Japan

South Korea

India

Rest of APAC

Latin America

Brazil

Rest of LATAM

Middle East & Africa

Saudi Arabia

UAE

South Africa

Rest of MEA

The report addresses the following key points:

The report estimates the expected market size from 2020-2028

The report provides a forecast of market drivers, restraints, and future opportunities for the Soil Testing Equipment market

The report further analyses the changing market dynamics

Regional analysis and segmentation of the market with analysis of the regions and segments expected to dominate the market growth

Extensive competitive landscape mapping with profiles of the key competitors

In-depth analysis of business strategies and collaborations such as mergers and acquisitions adopted by the key companies

Revenue forecast, country scope, application insights, and product insights

Thank you for reading our report. For any specific details on customization of this report, please get in touch with us. We will ensure the report you get is well-suited to your needs.
