The blockchain devices market consists of sales of blockchain devices and related services by entities (organizations, sole traders, and partnerships), which is referred to as a decentralized architecture with built-in security to improve transaction trust and integrity. Following the Internet, blockchain has revolutionized the exchange of information and media. Blockchain technology is widely regarded as a game-changing breakthrough and the harbinger of a new economic era.

## Global Blockchain Devices Market Trends

The adoption of wireless communication technology is a key trend gaining popularity in the blockchain devices market. According to the blockchain technology market research, organizations are adopting next-generation wireless technologies believe to gain competitive advantage and enable innovation. For instance, according to a Deloitte survey in June 2020, networking executives view advanced wireless technologies as increasingly critical to their enterprise success. 86% of networking executives surveyed believed that advanced wireless will transform their company in three years. Furthermore, 57% percent respondents reported that their organization is currently in the process of adopting 5G and/or Wi-Fi 6, and 37% plan to adopt these technologies within the next year.

## [Global Blockchain Devices Market Segments](#)

The global blockchain devices market is segmented:

By Type: Blockchain Smartphones, Crypto Hardware Wallets, Crypto Automated Teller Machines (ATMs), Point of Sales (POS) Terminals

By Connectivity: Wired, Wireless

By Application: Personal, Corporate

By End-User: Consumer, BFSI, Government, Retail and E-Commerce, Travel and Hospitality, Automotive, Transportation and Logistics, IT and Telecommunication, Others (Energy and Utilities, Education, Agriculture, Healthcare, Manufacturing)
