The implementation of advanced digital printing is a key trend shaping the ceramic tiles market outlook. According to the ceramic tiles global market research, digital printing enables manufacturers to offer a wide variety of designs of ceramic tiles to their customers to make their experience unique and modernized. For instance, Confindustria Ceramica, an Italy-based ceramic tiles provider, uses digital printing as a key technology in the production of Italian ceramic tiles. With the help of digital printing and advancement in technologies, artists are now able to create art on tiles as well as develop various textures and visuals on ceramic tiles. The digital printing technology evolution is helping manufacturers to create unique patterns and designs on individual tiles. The colors used in digital printing are also very realistic leading to increased demand. For instance, in April 2021, NG Kütahya Seramik Group, a Turkey-based leading ceramic tiles provider strengthened its partnership with System Ceramics by ordering

seven new digital printing systems namely 'Creadigit' for both its existing as well as new facility. The partnership focuses on technological innovation for NG Kütahya Seramik Group to offer unique solutions with high added value.
