The global forage seeds market consists of sales of forage seeds by entities (organizations, sole proprietors, partnerships) that are generally used by dairy farmers and farmers that produce forage for animal feed companies. Forage crops are plants that are planted expressly to be grazed by livestock or to be stored as hay or silage. Forage crops aid in meeting production requirements for traits including growth and weight increase, as well as compensating for seasonal feed demand and supply gaps.

## [Global Forage Seeds Market Trends](#)

The introduction of premier forages is a key trend gaining popularity in the forage seeds market. Major companies operating in the forage seeds sector are focused on introducing premier forages to meet consumer demand and reinforce their position.
