

# Artificial Intelligence in Genomics Market Sales Continue to Peak: Statistics Study by Market.us in 2022

*[150+ Market Pages Report] The global AI in genomics market is projected to reach USD 1,671 million by 2025 from USD 202 million in 2020, decent CAGR of 52.7%.*

NEW YORK CITY, NEW YORK, UNITED STATES, May 23, 2022

/EINPresswire.com/ -- According to the latest market report published by Market.us titled, "[Artificial Intelligence in Genomics Market 2022](#) Key Trends, Applications & Future Developments to 2031". Owing to the ongoing COVID-19 crisis, the Artificial Intelligence in Genomics Market witnessed stagnated sales in 2021. The rising demand from the industry is contributing to the Artificial Intelligence in Genomics Market growth (pre-pandemic) status in 2022. By extensive usage of SWOT analysis and Porter's five force analysis tools, the strengths, weaknesses, opportunities, and combinations of key companies are comprehensively deduced and referenced in the report.

It uses several approaches for analyzing the data of the target market such as primary and secondary research methodologies. It includes investigations based on historical records (2015-2020), current statistics, and futuristic developments. This study explicates "What has been the performance of the "Artificial Intelligence in Genomics Market" industry so far? And what will its future look like in the years ahead? Who are the winners are in the Artificial Intelligence in Genomics Market and what strategies have been adopted by them?"

The aim of the report is to estimate the size of the Artificial Intelligence in Genomics Market and the growth potential across different segments and sub-segments. This report provides insightful knowledge to the clients enhancing their basic leadership capacity and explores several significant facets related to Artificial Intelligence in Genomics Market covering the industry environment, segmentation analysis, and competitive landscape. Business strategies of the key players and the new entering market industries are studied in detail. This research report

will give a clear idea to readers about the overall scenario to further decide on this market project.

Want to learn more about the Artificial Intelligence in Genomics Market growth? Request for a PDF sample now@ <https://market.us/report/artificial-intelligence-in-genomics-market/request-sample/>

Note - In order to provide a more accurate market forecast (2022-2031), all market research reports will be updated before delivery by considering the impact of COVID-19.

Facet of the Artificial Intelligence in Genomics Market:

A thorough study of the competitive landscape of the Artificial Intelligence in Genomics Market has been given, presenting insights into the company profiles, financial status, recent developments, mergers and acquisitions. It provides detailed information about the structure and prospects for global and regional industries. In addition, the report includes data on research & development, new product launches, product responses from the global and local markets by leading players.

Researchers have criticized the profiles of the leading competitors functioning in this market in a bid to assess their growth prospects and the key strategies they have adopted for the development of their businesses. The main objective of this research study is to provide a clear understanding of the global market for Artificial Intelligence in Genomics Market to participants and assist them in creating crucial strategies to gain an edge over their competitors.

Planning to lay down future strategy? Speak with an Analyst to learn more: <https://market.us/report/artificial-intelligence-in-genomics-market/#inquiry>

Other features of the report:

- Key strategies with a focus on the R&D methods, localization strategies, corporate structure, production capabilities, sales, and performance in various companies.
- Provides valuable insights into the product portfolio, including product planning, development, and positioning.
- Analyses the role of key market players and their partnerships, mergers, and acquisitions.
- Data Segmentations: Market Size, Global, By Region and Country, Historic and Forecast, and Growth Rates for 60 Geographies

The study provides a comprehensive outlook vital to keeping market knowledge up to date. The segments and sub-section of Artificial Intelligence in Genomics Market is shown below:

Some of the Pivotal Players From Research Coverage:

IBM  
Microsoft  
NVIDIA Corporation  
Deep Genomics  
BenevolentAI Ltd.  
Fabric Genomics Inc.  
Verge Genomics  
Freenome Holdings Inc.  
MolecularMatch Inc.  
Cambridge Cancer Genomics  
SOPHiA GENETICS  
Data4Cure Inc.  
PrecisionLife Ltd.  
Genoox Ltd.  
Lifebit  
Diploid  
FDNA Inc.  
DNAnexus Inc.  
Empiric Logic  
Engine Biosciences Pte. Ltd.

Key Findings of the Artificial Intelligence in Genomics Market: By Offering

Software  
Services

By Technology

Machine Learning  
Computer Vision

By Functionality

Genome Sequencing  
Gene Editing

Artificial Intelligence in Genomics Market Major Applications/End Users

By Application

Topographical Study:

1. North America (the United States, Canada and Mexico)
2. Asia-Pacific (Japan, China, India, Australia etc)
3. Europe (Germany, UK, France etc)
4. Central and South America (Brazil, Argentina etc)
5. The Middle East and Africa (United Arab Emirates, Saudi Arabia, South Africa etc)

Access the full study findings here: <https://market.us/report/artificial-intelligence-in-genomics-market/>

Reasons to snap up the report:

1. How to create a positioning strategy that is effective
2. Expert opinions about market evaluation
3. Be aware of possible barriers to entry
4. Strategic and informed decision making
5. Learn how the first movers operate
6. Take action to seize future opportunities

Key Questions Answered with this Study

- 1) Is the Artificial Intelligence in Genomics Market feasible for long-term investment?
- 2) Which geographic region would see the greatest demand for product/services?
- 3) What opportunities would emerging territories offer established and new entrants to the

Artificial Intelligence in Genomics Marketplace?

4) What is the risk side analysis of service providers?

5) What are the factors that will drive the demand for Artificial Intelligence in Genomics Market in the next few years?

6) What is the impact analysis for various factors in the Global Artificial Intelligence in Genomics Market Growth?

7) How can big players increase their share of mature markets?
