The report also includes competitor and regional analysis, and contemporary advancements in the global market. The market reached a volume of 16,318 Tons in 2020. The global jojoba oil market to reach a volume of 24,352 Tons by 2026.

Jojoba oil refers to a polyunsaturated liquid wax that is derived from crushing the beans of jojoba, or *Simmondsia Chinensis*, a perennial shrub. The jojoba beans possess chemical properties that are similar to a human body's natural oils or sebum. Besides this, it is hypoallergenic and can be easily absorbed by the skin while preventing bacterial and fungal microbe growth and providing nourishment to dry skin. Therefore, jojoba oil is extensively used as an alternative to animal fats in the production of skincare products, antibiotic stabilizers, and appetite depressants.

As the novel coronavirus (COVID-19) crisis takes over the world, we are continuously tracking the changes in the markets, as well as the purchase behaviours of the consumers globally and our estimates about the latest market trends and forecasts are being done after considering the impact of this pandemic.

Jojoba Oil Market

## Jojoba Oil Market Trends:

The market is primarily driven by the increasing adoption of organic beauty products with natural ingredients. This can be attributed to the rising awareness among the masses regarding the adverse effects of chemicals used in cosmetics. In line with this, the widespread product demand in herbal medicine applications is also acting as a significant growth-inducing factor for the market. The market is further driven by the growing utilization of jojoba oil as a core ingredient in pharmaceutical products. Additionally, extensive research and development (R&D) activities and the inflating per capita income levels of the masses are creating a positive market outlook.
