

ePrescribing Market Plays An Essential Role In Office-Based Physicians and Pharmacies by Market.us

[200+ Market Pages] The Worldwide ePrescribing market size is projected to reach USD 3.3 billion by 2025 from USD 1.2 billion in 2020, Strong CAGR of 23.3%.

NEW YORK CITY, NEW YORK, UNITED STATES, May 23, 2022

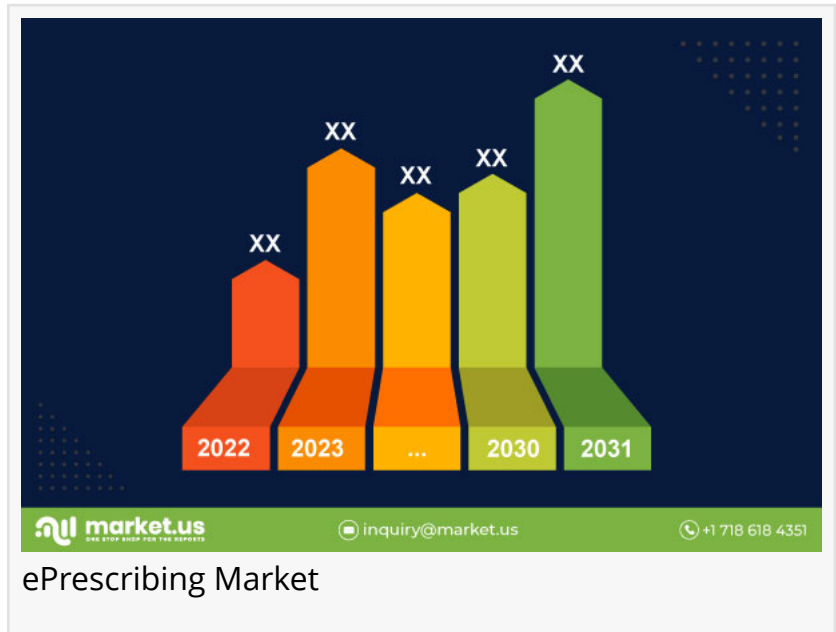

/EINPresswire.com/ -- The use of [electronic prescribing](#) (ePrescribing) has been growing in popularity as a means to improve patient care.

Electronic prescribing is the process of electronically transferring orders for medications and other medical

supplies from a physician's computer to a pharmacist's or other health care provider's computer. Physicians who use ePrescribing typically save time by having all their prescriptions in one place, and they can communicate with pharmacists more easily about medication needs. E-prescriptions also reduce the risk of medication errors, which can lead to complications for patients.
