

# Aviation Cyber Security Market 2022-2027 | Industry Trends, Size, Share, Growth and Competitive Analysis

SHERIDAN, WY, USA, May 24, 2022 /EINPresswire.com/ -- According to IMARC Group's latest report, titled "[Aviation Cyber Security Market: Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2022-2027](#)", the global aviation cyber security market reached a value of US\$ 3.9 Billion in 2021. Looking forward, IMARC Group expects the market to reach US\$ 6.0 Billion by 2027, exhibiting a CAGR of 7.27% during 2022-2027.

Aviation cyber security is the practice of protecting the IT infrastructure and networks against cyberattacks within the aviation sector. The security system includes air traffic management systems, air navigation systems, cabin crew devices, onboard [aircraft](#) control and communication systems, in-flight entertainment systems, flight information systems, and cargo handling and shipping. The aviation industry uses these computer-based interconnected systems to perform ground and flight operations. Aviation cyber security systems also help the airline companies in resisting future disruptions and preventing harm to their services and reputation.

We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.

Market Trends and Drivers:

The aviation cyber security market is primarily driven by the increasing air passenger traffic and rising cases of cyberattacks. The governments of several nations are actively working to develop a cyber regulatory framework for aircraft to ensure safety and security standards. Apart from this, the upgradation of the existing aircraft with advanced technologies and the increasing [investments](#) in research and development (R&D) activities are other factors creating a positive

outlook for the market.

## Aviation Cyber Security Market 2022-2027 Competitive Analysis and Segmentation:

### Competitive Landscape With Key Players:

The competitive landscape of the aviation cyber security market has been studied in the report with the detailed profiles of the key players operating in the market.

Some of these key players include:

- Airbus SE
- BAE Systems Plc
- Booz Allen Hamilton Holding
- Cisco Systems Inc.
- Fortinet Inc.
- General Dynamics Corporation
- Honeywell International Inc.
- International Business Machines Corporation
- Lockheed Martin Corporation
- Palo Alto Networks Inc.
- SITA N.V.
- Thales Group
- Unisys Corporation

### Key Market Segmentation:

The report has segmented the global aviation cyber security market on the basis of solution type, deployment type, application and region.

### Breakup by Solution Type:

- Threat Intelligence and Response
- Identity and Access Management
- Data Loss Prevention
- Security and Vulnerability Management
- Managed Security
- Others

### Breakup by Deployment Type:

- Cloud-Based
- On-Premises

## Breakup by Application:

- Airline Management
- Air Cargo Management
- Airport Management
- Air Traffic Control Management

## Breakup by Region:

- North America
- Asia Pacific
- Europe
- Latin America
- Middle East and Africa

## Key Highlights of the Report:

- Market Performance (2016-2021)
- Market Outlook (2022-2027)
- Market Trends
- Market Drivers and Success Factors
- Impact of COVID-19
- Value Chain Analysis
- Comprehensive mapping of the competitive landscape

If you need specific information that is not currently within the scope of the report, we will provide it to you as a part of the customization.

## About Us

IMARC Group is a leading market research company that offers management strategy and market research worldwide. We partner with clients in all sectors and regions to identify their highest-value opportunities, address their most critical challenges, and transform their businesses.

IMARC's information products include major market, scientific, economic and technological developments for business leaders in pharmaceutical, industrial, and high technology organizations. Market forecasts and industry analysis for biotechnology, advanced materials, pharmaceuticals, food and beverage, travel and tourism, nanotechnology and novel processing

methods are at the top of the company's expertise.

Our offerings include comprehensive market intelligence in the form of research reports, production cost reports, feasibility studies, and consulting services. Our team, which includes experienced researchers and analysts from various industries, is dedicated to providing high-quality data and insights to our clientele, ranging from small and medium businesses to Fortune 1000 corporations.
