The sewing machine market consists of sales of sewing machines by entities (organizations, sole traders, and partnerships) that refer to a machine used to stitch fabric and other materials together with thread. Sewing machine is used to improve the fineness and appearance of fabrics. They are mainly used to produce garments, textiles and other fabrics. Sewing machines offer a variety of plain or patterned stitches. They include means for gripping, supporting, and conveying the fabric past the sewing needle to form the stitch pattern. Most home sewing machines and many industrial machines use a two-thread stitch called the lockstitch. In the textile industry, two types of sewing machines are used - manual swing machines and electric sewing machines.

[Global Sewing Machine Market Trends](#)

Technological advancement is a key trend gaining popularity in the sewing machine market. Companies are launching products with new technologies to increase revenues and gain customers. For example, in July 2020, based on consumer insights and preferences, Usha International added four new sewing machines for sewing, embroidery, and quilting - Skyline S-9, Memory Craft 9850, 6700 P, and Memory Craft 550E. These machines will cater to the needs of the growing numbers of hobbyists and smaller commercial establishments and a wide range of

technologically superior features to consumers who demand improved precision control.

Global Sewing Machine Market Segments

The global sewing machine market is segmented:

By Type: Mechanical, Electronic, Automated, Embroidery, Overlock, Others
