

Morrisville Tavern Gets A Well Deserved Sign Upgrade With Slicks Graphics

Slicks Graphics has recently purchased a channel letter bender and we are already putting it to work with a new sign upgrade for Morrisville Tavern.

MORRISVILLE, PENNSYLVANIA, UNITED STATES, May 25, 2022

/EINPresswire.com/ -- Slicks Graphics was thrilled to be connected with the local community's preferred place for a pint. Morrisville Tavern was equipped with three old and weathered cabinet signs that have seen better days and they wanted to get a more modern sign that would stand out. After they contracted Slicks Graphics to replace the signs, they got right to work with planning, fabrication, and then of course, installation.

All of the signs, vehicle and trailer wraps, including fleet graphics, are designed, produced, and fabricated in house at the Slicks Graphics headquarters in Morrisville, Pennsylvania. The Morrisville Tavern sign was no different. First, Slicks Graphics began with utilizing their latest equipment acquisition - the SDS Inc. ChannelBender. This newly acquired piece of hardware allows Slicks Graphics to provide their clients with higher quality and longer lasting channel letters. With the added accuracy of the SDS ChannelBender, a new channel letter sign is sure to give a unique look amongst the competition.

The new Morrisville Tavern Sign At Night

For this sign Slicks Graphics decided to replace the three cabinet signs with one big channel letter sign. After surveying the building they decided the best option for installation would be a large sturdy panel and fasten the letters directly to it. Once the letters were all bent into shape, the next step was mount them to the panel. Slicks Graphics matched the blue color of the building and painted the panel in order for it to blend in, so the 4 inch deep LED lit letters in white would stand out during the night or day.

With the length of the sign being over 22 feet, and reports of storms incoming Slicks Graphics knew that installing it would be a bit of a challenge - however at Slicks Graphics they always enjoy a good challenge and are always up for the task. The Slicks Graphics sign installation team loaded up the new sign and went to Morrisville Tavern. During the installation process the team had to be careful, the length of the sign made it quite flexible and the added wind did not help. In order to make it stay level and to secure it, the installation team needed to have a steady hand as well as a good spotter on the ground giving direction. When it comes to sign installations and repairs, Slicks Graphics has seen and done it all. They were able to complete this project from start to finish in record time thanks to the new equipment and their hardworking team.

Be sure to go see the new Morrisville Tavern sign located at 376 W Trenton Ave, Morrisville, PA 19067. If one's business is in need of a new sign, want to change the way a current sign looks into something more eye catching, if one is interested in saving money on the electric bill by converting an existing sign to LED or if one needs sign repairs - contact Slicks Graphics. Available Monday through Friday from 9:00AM until 5:30PM by calling 215-736-8000 or sending an email
