The emergency lighting market consists of sales of emergency lighting by entities (organizations, sole traders, and partnerships) that are designed to activate when a power outage creates low-visibility conditions. It allows the safe, rapid, and effective evacuation of places and buildings not only in the event of a power loss but even when the main lighting is still accessible. Emergency lighting lowers panic and saves lives by providing critical illumination and directing occupants to safe locations and safety equipment.

## [Global Emergency Lighting Market Trends](#)

Technological advancements are a key trend gaining popularity in the market. According to the emergency lighting market research, major players are focusing on developing technologically advanced products to lead the market. For instance, in March 2020, ABB Ltd., a Switzerland-based company that manufactures and sells electrification, industrial automation, and robotics launched the Naveo Pro system. This system allows customers to set up, maintain and fully control their entire emergency lighting installation with a new mobile app by providing a real-time overview of all systems, saving time, enabling better maintenance planning, and enhancing building safety by keeping a record of all activities safely in the cloud.
