The glucose market consists of sales of glucose products by entities (organizations, sole proprietorships, and partnerships) that are used to deliver carbohydrate calories when a person is unable to eat due to illness, accident, or another medical condition. Glucose is the most common form of sugar in the blood and the body's primary source of energy. Glucose is used in the production of flavor enhancers, stabilizers, taste enhancers, humectants, vitamins, preservatives, coatings, and bulking agents. The main property of glucose is that it prevents sugar molecules from crystallizing in confectionaries.

Global [Glucose Market Trends](#)

The introduction of low sugar glucose syrup has emerged as a key trend gaining popularity in the glucose market. Major companies operating in the glucose market are focused on the introduction of low-sugar glucose syrups to meet consumer demand and reinforce their position. For instance, in November 2020, Ingredion, a US-based company that manufactures glucose-related products launched a stable sweet low sugar glucose syrup. It is manufactured with the help of corn. The company would bring these stable sweet low sugar glucose syrups in different forms such as chewy sweets, lollipops, hard-boiled candy, jellies, and gummies. This helps to reduce stickiness and sugar recrystallization of the final product while providing
