The liquid fertilizers market consists of sales of liquid fertilizers by entities (organizations, sole traders, and partnerships) that are used to improve the quality or quantity of plant growth. Liquid fertilizers are extracts of soluble chemicals that are directly sprayed on crops or plants or can be injected into the soil by pressure. These are used in crop nutrition activities in a wide variety of crops.

Global [Liquid Fertilizers Market Trends](#)

Product innovations have emerged as one of the key liquid fertilizers market trends gaining popularity. Major players in the market are focusing on developing innovative products for market growth and a strong product portfolio. For instance, in May 2020, Wilbur-Ellis, a US-based agriculture technology, and products company launched two new potassium fertilizer technologies, TILL-IT KOMPOUND and FOLI-GRO KILO. These are highly soluble, carbon-based potassium fertilizers that drive bio-activation in soil or as a foliar-applied product. FOLI-GRO KILO is a carbon-based potassium source that is with high solubility and accessibility for any foliar, in-furrow, or soil-applied liquid fertilizer application. TILL-IT KOMPOUND has combined the KILO technology with sulfur, creating a solution for straight applications or combinations with urea
