## Market Trends:

On account of the rising population, rapid urbanization and increasing industrialization, a significant rise in the consumption of energy has been experienced in recent years. The consequent increase in energy production has provided a boost to underground mining activities across the globe. In addition to this, underground mining causes negligible harm to the environment when compared to surface mining, as the explosions are made underground and no toxic gases are released into the surroundings. Furthermore, miners in developed countries like the United States, Europe and Japan are replacing their older mining equipment to adhere to government regulations and improve their overall productivity which, in turn, is strengthening the growth of the underground mining equipment market. Other growth-inducing factors include the lack and increasing cost of skilled labor, rising use of [high](#)-quality equipment, and the growing focus on enhancing the yield and productivity.

## Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global underground mining equipment market, along with forecasts at the global and regional level from 2022-2027. Our report has categorized the market based on type of mining and application.

#### Competitive Landscape:

Caterpillar Inc  
Epiroc AB  
Hitachi Construction Machinery Co.  
Komatsu Ltd  
Liebherr  
Sandvik AB  
Sany Group Co., Ltd.  
Volvo, BELAZ  
XCMG Group.

#### Breakup by Type of Mining:

Longwalls  
Room and Pillars

#### Breakup by Application:

Coal Mining  
Metal Mining  
Mineral Mining

#### Regional Insights:

Asia Pacific  
North America  
Europe  
Middle East and Africa  
Latin America

About Us

IMARC Group is a leading market research company that offers management strategy and market research worldwide. We partner with clients in all sectors and regions to identify their highest-value opportunities, address their most critical challenges, and transform their businesses.

IMARC's information products include major market, scientific, economic and technological

developments for business leaders in pharmaceutical, industrial, and high technology organizations. Market forecasts and industry analysis for biotechnology, advanced materials, pharmaceuticals, food and beverage, travel and tourism, nanotechnology and novel processing methods are at the top of the company's expertise.

Our offerings include comprehensive market intelligence in the form of research reports, production cost reports, feasibility studies, and consulting services. Our team, which includes experienced researchers and analysts from various industries, is dedicated to providing high-quality data and insights to our clientele, ranging from small and medium businesses to Fortune 1000 corporations.
