This report covers the current scenario and growth prospects of Global Medical Cannabis Market for the period 2022 to 2028. The study is a professional and in-depth study with around – no. of tables which provides statistics of actual scenario of industry and acts as valuable guide to direction companies and individuals interested in the domain.

Market Analysis and Insights: Global Medical Cannabis Market

Cannabis is a psychoactive drug that is derived from the cannabis plant of the Cannabaceae family. For several years, it has been used medicinally and has wide range of applications in treatment of various diseases including chronic pain, cancer, depression, diabetes, arthritis, glaucoma, epilepsy, migraines, AIDS and Alzheimer's among others.

The increased usage of cannabis in the cosmetic products can be seen as a driver for the medical cannabis market. Complex regulatory structure for usage of cannabis is a restraint for the medical cannabis market. Novel product development with increased R & D activities may act as an opportunity for the medical cannabis market. The rise of marijuana black market is a challenge for the medical cannabis market.

Global Medical Cannabis Market Scope and market size

The medical cannabis market is categorized into eight notable segments which are based on the product, source, species, derivatives, application, route of administration, end user and distribution channel. The growth among segments helps you analyse niche pockets of growth and strategies to approach the market and determine your core application areas and the difference in your target markets.

On the basis of product, the medical cannabis market is segmented into oil, medical cannabis capsules, patch, whole flower, ground flower, vape pen, dried medical cannabis, creams & moisturizer, mask & serum, cleanser and others. In 2021, oil segment is expected to dominate the medical cannabis market due to high technology adoption by key players in the market.

On the basis of source, the medical cannabis market is segmented into synthetic and natural. In 2021, synthetic segment is expected to dominate the medical cannabis market because of increasing healthcare expenditure.

On the basis of species, the medical cannabis market is segmented into cannabis indica, sativa and hybrid. In 2021, cannabis indica segment is expected to dominate the medical cannabis market because of increased medicinal use of cannabis.

On the basis of derivatives, the medical cannabis market is segmented into cannabidiol (CBD), tetrahydrocannabinol (THC)/delta-8-tetrahydrocannabinol, cannabitol, cannabigerol (CBG) and others. In 2021, cannabidiol (CBD) segment is expected to dominate the medical cannabis market due to increasing demand of medical marijuana products in the market.

On the basis of application, the medical cannabis market is segmented into Alzheimer's disease, appetite loss, cancer, epilepsy, autism, mental health conditions, multiple sclerosis, pain management, nausea, muscle spasms, arthritis, elevate mood, depression and sleep disorders, anxiety and others. In 2021, Alzheimer's disease segment is expected to dominate the medical cannabis market because of increasing R&D activities.

On the basis of route of administration, the medical cannabis market is segmented into oral solutions and capsules, smoking, vaporizers, topicals and others. In 2021, oral solutions and capsules segment is expected to dominate the medical cannabis market because of rising prevalence of chronic diseases.

On the basis of end user, the medical cannabis market is segmented into pharmaceutical industry, research and development centers, homecare settings, hospital and rehab centers and others. In 2021, pharmaceutical industry segment is expected to dominate the medical cannabis market because of increasing geriatric population and prevalence of chronic diseases.

On the basis of distribution channel, the medical cannabis market is segmented into B2B and B2C. In 2021, B2B segment is expected to dominate the medical cannabis market because of increasing demand of cannabis for medical and clinical purposes.
