The cookie, cracker, pasta, and tortilla products market consists of sales of the cookie, cracker, pasta, and tortilla products by entities (organizations, sole traders, and partnerships) that produce cookie, cracker, pasta, and tortilla products. The companies in the cookie, cracker, pasta, and tortilla products industry produce cookies and crackers, prepare flour and dough mixes and dough from flour ground elsewhere or manufacture dry pasta. The establishments in this industry may package the dry pasta they produce with other ingredients. The companies package and distribute their products through various distribution channels to both individual customers and commercial establishments.

region of wavelengths between 700nm and 2500nm. The flour used in manufacturing can vary considerably in its protein quality, protein quantity, moisture, enzymatic activity, color, and physical properties when obtained from different sources. The Near-infrared spectroscopy (NIR) method estimates the moisture content of flour and regulates it to an optimal level set by an operator. NIR moisture analyzer can help save energy and improve the quality of the product. For instance, MoistTech Corp is used by a majority of manufacturers for checking moisture content during the production process.
