Yes

There is no such protection offered with Hodlnaut deposits (or SIPC protection either). But remember, no cryptocurrency management platform offers this either.

When it comes to platform security risk, Capitalevotrade runs on AWS and all traffic is SSL-encrypted. Further, all cryptocurrencies that are held in custody with Capitalevotrade are transferred to self-custodied cold wallets or lent to borrowers. It uses no hot wallets whatsoever. They also have a whitelisting feature to ensure that withdrawals only occur to approved addresses..

'How safe are my investments?'

Capitalevotrade offers a 100% cashback policy and their customer care (support@capitalevotrade.com) usually responds to queries almost instantly. This combined with

their live chat widgets makes it easy to lodge complaints and have them resolved instantly.
