The machinery market consists of sales of agricultural, industrial and commercial machinery by entities (organizations, sole traders, or partnerships) that produce agricultural, industrial and commercial machinery. These establishments assemble parts into components, sub-assemblies, and complete machines.

Global Machinery Market Trends

HVAC systems are being integrated with building automation systems for the overall management of a building to maximize energy efficiency. BAS receives analog or digital inputs from the sensors installed in HVAC and the integrated system is managed by a single dashboard accessed from a computer. These integrated systems improve building performance, save energy, and shrink the environmental footprint. HVAC systems account for 60-70% of the total energy consumption of a typical commercial building, thus integrated systems enable commercial establishments to reduce power consumption.
