Faucets refer to the type of devices that are utilized for controlling the flow of water by the use of tap or cock. The valve open and control the flow of water under any condition by turning the handle. These handles are made up of brass, zinc, plastic or any other material.

The change in the lifestyles of people across the globe acts as one of the major factors driving the growth of faucets market. The increase in the preference for functional kitchens and bathrooms, along with an aesthetic appeal, and growing application of modernized bathrooms and kitchens accelerate the market growth. The availability of various combinations concerning material and designs to cater to the consumer demand for customized faucets and inclination towards comfort, convenience, and compactness while buying products among consumers further influence the market.
