

Healthcare Business Intelligence Market To Expand At A CAGR Of 14.7% Amidst The Growing Government Support

Healthcare Business Intelligence Market Trend – Rise in adoption of data-driven decision-making solutions in the healthcare industry

VANCOUVER, BC, CANADA, May 30, 2022 /EINPresswire.com/ --

The global [healthcare business intelligence market](#) is anticipated to reach value of USD 15.14 Billion by 2027, according to a current analysis by Emergen Research. The global healthcare business intelligence(BI) market is expected to expand

significantly during the forecast period, owing to increasing demand for improved claim management solutions in the healthcare industry. Rising demand for better cost management solutions is likely to drive the global healthcare business intelligence market further in the near future. Moreover, rising adoption of data-driven decision-making solutions in the healthcare industry is also expected to drive the global healthcare BI market during the forecast period.

“

Market Size – USD 5.40 Billion in 2019, Market Growth – at a CAGR of 14.6%, Market Trend – Rise in adoption of data-driven decision-making solutions in the healthcare industry”

Emergen Research

However, high development cost of business intelligence solutions is expected to impede the market during the forecast period.

Since the advent of the outbreak, the global economic landscape has been grappling with adverse financial consequences. The report analyzes the drastic impact of the pandemic on this business sphere. The pandemic has

affected nearly all segments of the Healthcare Business Intelligence market. It has further hampered the developmental scope of various manufacturers and buyers engaged in this sector. Thus, the report studies the industry's shifting dynamics to scrutinize the profits earned

Key Highlights of Report

In August 2020, Knarr Analytics LLC was acquired by Qlik Technologies Inc. The deal would improve Qlik's Cloud Platform Active Intelligence capability, which offers comprehensive insights to enable data-driven activities.

During the forecast period, the software segment is expected to retain the largest market share, expanding at a CAGR of 14.7%. Business intelligence software helps healthcare organizations collect, interpret, and process data into appropriate business information, which is projected to fuel the segment during the forecast period.

During the forecast period, the cloud-based segment is projected to dominate the market. Cloud-based business intelligence applications offer improved accessibility, enhanced data protection, easy implementation, and simplified data analysis, which is likely to promote growth of the segment during the forecast period.
