Emergen Research

Rapid urbanization and industrialization in emerging economies are key factors contributing to the increasing adoption of solid waste management solutions. The growing initiatives of the government to reduce the contamination of water bodies and carbon emissions are most likely to propel the growth of the market over the forecast period. Utilization of the municipal solid waste (MSW) as fuel to generate renewable energy sources through thermal and biological techniques is projected to drive growth opportunities for the future. The increasing

preference of the developed countries towards Zero waste generation and waste recycling will surely boost the demand for solid waste management and recycling solutions.

The report pays special attention to the key elements of the Solid Waste Management Market, such as drivers, restraints, opportunities, threats, risks, limitations, and other aspects.
